

▯ **Managing VC - Automated Testing of VC Product Models**

eSpline now offers a unique software solution that enables SAP Variant Configurator users to thoroughly test their product models using a specifically designed application for SAP VC product models.

Manual testing can be a thing of the past

A recent survey of over 100 SAP Variant Configurator consultants and users had some startling findings:

1. 9 out of 10 Variant Configurator users test VC Models in their Production instance
2. Testing is manual
